# SpeedLane® Pro

Houston Radar SpeedLane® Pro

The Houston Radar SpeedLane® Pro is state of the art **true dual beam, low power side-fire radar**. It is designed to accurately detect lane, speed and class of individual vehicles and compute per lane volume, occupancy, gap, average speed, 85th percentile and headway parameters.

Features and Benefits

➢ Patented (US10317525) true dual beam "speed trap" technology inherently provides accurate measurements without the need for in situ calibration.

➢ 255 feet (78m) detection range allows flexible deployments.

➢ World's lowest power usage highly integrated multi-lane traffic measurement radar.

➢ FCC and CE approved for full 250MHz operation to suite variety of application requirements.

➢ Mounts on the side of the road for non-intrusive traffic data collection and works in all weather and lighting conditions.

➢ Simultaneously measures all vehicles in 16 user defined lanes.

➢ All traffic measurements are on a per vehicle, per-lane basis, available in real-time and stored in device memory.

➢ Lane-by-lane vehicle counts, vehicle counts by user defined speed bins, length-based class by user defined length bins, average and 85th percentile speeds, occupancy, headway, and gap measurements.

➢ 1 Million individual vehicle memory allows un-interrupted data storage even in the event of communication outages.

➢ Companion Windows application provides intuitive GUI to set all configuration parameters, display real time plots of targets and view snapshots & streaming HD video.

➢ Android smartphone and tablet app for setup and camera view ease field setup and maintenance.
